Vertical Panel–Head Detail
(Isolated Head Angles)

Notes:
1. Interior perimeter sealants may be omitted for specific applications, subject to the project’s design and operational requirements.
2. Fire protection of the head structural may be required, subject to the project’s building code requirements. Fire protection of the structural members is not by Metl-Span.
3. To conform to the requirements of the ASTM E119 fire resistance rating, the filler insulation must have an approved classification marking for surface burning characteristics or fire resistance.
4. Reference the roof or ceiling system’s erection drawings for specific construction details.
