Vertical Panel–Stack Joint Detail

Notes:
1. Interior perimeter sealants may be omitted for specific applications, subject to the project’s design and operational requirements.
2. Fire protection of support structurals may be required, subject to the project’s building code requirements. Fire protection of the structural members is not by Metl-Span.
3. *Fastener type is subject to the support structural material and the panel thickness.
4. To conform to the requirements of the ASTM E 119 fire resistance rating, the filler insulation must have an approved classification marking for surface burning characteristics or fire resistance.
