

General Wall Assembly

Notes:

1. Shown is a general representation of a barrier wall assembly with metal stud wall framing, HPCI barrier panels and barrier panel flashing.
2. Reference the following details in this section for barrier panel to wall framing connections and flashing details.
3. Reference the HPCI Barrier Panel technical data sections for specific barrier panel information.
4. It is the project designer's responsibility to confirm the suitability, structural adequacy and code compliance of the actual wall assembly and its components.
