

2019

Insulated Metal Panel Installation Training

Become a Certified Installer
in a High-Demand Product Line

With superior energy efficiencies and aesthetic appeal, demand for Insulated Metal Panels (IMPs) is on the rise. Take advantage of this growing construction trend by mastering the art of application through Metl-Span's IMP Installation Training.

INSULATED
METAL
PANELS

Metl-Span's Training is Open to Metal Building Contractors & Erectors – Sign Up, or Contact Us Today to Learn More!

Our three-day course combines classroom lectures with hands-on installation training for IMP Roof, Vertical Wall and Horizontal Wall applications, as well as our Thermalsafe Fire Resistant Wall Panel, enabling you to:

- Identify proper and improper panel applications
- Focus on critical sealant and fastener installation techniques
- Learn how to install roof accessories to avoid damage and leaks
- Get helpful tips to improve the speed and effectiveness of installation
- Troubleshoot roof situations prone to leaks, and learn how to avoid and correct common pitfalls
- Become part of METL-SPAN's national installer database accessed by developers and contractors
- Receive an Installer Certification for the IMP panel profiles covered in the class which stays with you no matter what company you work for and can be used nationwide

Certification training includes all of the following IMP Products:

Concealed Fastener Vertical Insulated Wall Panels

ThermalSafe® Fire Resistant Panels

CFR® Roof Panels

Architectural Horizontal Insulated Wall Panels (NEW)

<u>Day 1: Vertical & ThermalSafe</u>	7:00am – 12:00pm 1:00pm – 5:00pm	Classroom Session Hands-On Session
<u>Day 2: CFR Roof</u>	7:00am – 12:00pm 1:00pm – 5:00pm	Classroom Session Hands-On Session
<u>Day 3: Horizontal</u>	7:00am – 12:00pm 1:00pm – 5:00pm	Classroom Session Hands-On Session

Note: You must attend both the Classroom and Hands-On sessions to complete the courses and be eligible for certification. Registration, application, and fees are required for attendance.

With exception of the Oklahoma City and Houston locations, the classroom portion of the seminar will take place at the hotel. Hands-On portion of the seminar will take place at the manufacturing plant. Houston seminar will be located entirely at the NCI Training Center and Oklahoma City seminar will be located entirely at the Oklahoma City Training Center.

These programs do not cover nor certify installers for cold storage applications.
