Bet on IMPs for Casino and Hotel Construction

The travel and tourism industry across the United States is growing at a rapid rate.

Hotel construction rates have reached cyclical highs and casinos worldwide have realized a revenue increase of $15 billion over the last three years alone. With that added revenue, hospitality venues are reinvesting those funds into renovations. In fact, Atlantic City’s Harrah’s Resort recently completed a $250 million renovation.

**Metl-Span® insulated metal panels** (IMPs) provide hospitality venues with a product that caters to a fast-paced construction or retrofit schedule, and delivers both superior insulation values and a pleasant aesthetic. This unique combination enables these facilities to greet guests with an upscale façade that matches the level of high-profile accommodation inside.

**Metl-Span IMP Benefits:**

**Impressive Insulation** – Whether it’s sitting down to play cards at a casino or simply relaxing in a hotel room, guests at hospitality venues expect to enter a space where they feel comfortable. With an advanced polyurethane core, impermeable faces and built-in thermal breaks, Metl-Span IMPs ensure the highest level of insulation throughout a building’s lifecycle.

**Expedited Installation** – With the sharp growth of casinos and hotels in the U.S., hospitality facilities are faced with a need to expand. Thanks to one-piece construction and all-weather installation, Metl-Span IMPs can be installed five times faster than brick construction to ensure your next construction project stays on or ahead of schedule.

**5-Star Aesthetics** – Tourists expect a high-end aesthetic both inside and outside the facility. Metl-Span IMPs feature an extensive color palette and premier finishes to create an elegant exterior environment that can help make your facility an enticing tourist destination.

For more information on how Metl-Span insulated metal wall systems can impact your next hospitality project, visit [metlspan.com/markets/hospitality](http://metlspan.com/markets/hospitality). To discuss requirements and options for your next project, call 877.585.9969.
**CF Architectural Horizontal**

**PRODUCT SPECIFICATIONS**

- WIDTH: 24", 30", 36"
- THICKNESS: 2", 2 1/2", 3", 4"
- LENGTH: 8'-0" to 32'-0" for embossed
  8'-0" to 16'-0" or unembossed

**EXTERIOR PROFILE:** Flat appearance providing a monolithic look, embossed or unembossed
