

## V6 X-SPAN CLIP

The V6 X-Span Clip is a V-shaped, reversible, 6"-long, 16-gauge clip specifically designed to fit the joinery of Metl-Span CF panels. The main purpose of this design is to eliminate back fastening on projects with high wind loads, resulting in time labor and material savings. Only two clip fasteners are required at each support per panel in lieu of up to four back fasteners.

## Advantages

### V6 X-Span Clip Assembly

- (2) clip fasteners per panel in lieu of up to (4) back fasteners at each support per panel
- Installers are no longer required to access panel from interior side after installation
- Less time and fewer resources required

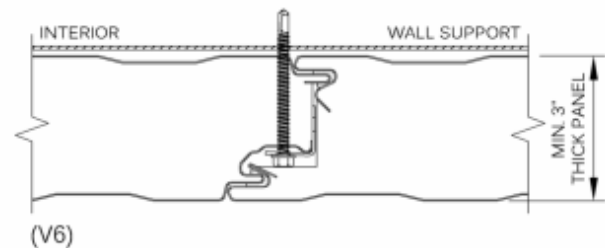

### V6+ X-Span Clip Assembly

- (2) clip fasteners per panel in lieu of up to (4) back fasteners at each support per panel
- Installers are no longer required to access panel from interior side after installation
- Less time and fewer resources required
- Ties female face to male clip support
- Pan head delays pullover under negative load
- Masked by trim at panel ends
- No thermal bridge
- No penetration of liner air/water barrier
- Same face-to-clip fastener for all panel thicknesses

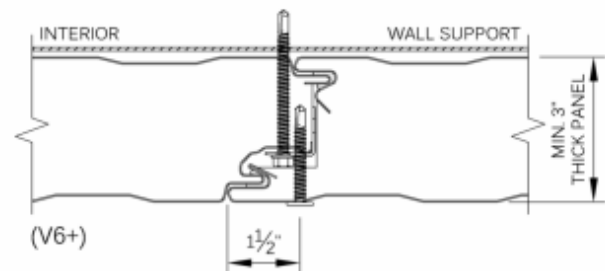

### V6/V6+ X-SPAN CLIP ASSEMBLY

(REVERSIBLE CF CLIP)  
[4634GNC]

ONE V6 X-SPAN CLIP AT EACH SUPPORT

ONE V6 X-SPAN CLIP AT EACH SUPPORT  
WITH ONE FACE-TO-CLIP FASTENER AT  
EACH END SUPPORT

INSTALL 2" LONG FACE-TO-CLIP FASTENER  
THROUGH PANEL FACE TONGUE AND  
ADJACENT PANEL CLIP, 1 1/2" FROM PANEL  
JOINT AT PANEL ENDS ONLY.
