

Vertical Panel-Eave Or Rake Detail
(Roof Panel Construction)

- Notes:
1. Fire protection of the rake and eave structural may be required, subject to the project's building code requirements. Fire protection of the structural members is not by Metl-Span.
 2. *Fastener type is subject to the eave or rake structural material and the panel thickness.
 3. To conform to the requirements of the ASTM E119 fire resistance rating, the filler insulation must have an approved classification marking for surface burning characteristics or fire resistance.
 4. Reference the roof system's erection drawings for specific construction details.
